FULL-STACK WEB DEVELOPER | PHP (LARAVEL) | VUE.JS | MYSQL | UI/UX DESIGN

PROFESSIONAL SUMMARY

Information Systems graduate with experience in full-stack web application development, UI/UX design, and business process digitalization. Experienced in designing an internal e-procurement system and developing functional web applications using PHP (Laravel), JavaScript (Vue.js), and MySQL. Proficient in integrating RESTful APIs, debugging with AI coding assistants (GitHub Copilot), and configuring web deployments. Possesses a growth mindset and strong analytical skills to build efficient technological solutions.

TECHNICAL SKILLS

- Tech Stack: PHP, Laravel, JavaScript, Vue.js, HTML, CSS, SQL/MySQL
- Tools & Platform: Git, GitHub, Figma, AI Coding Assistants
- Core Competencies: RESTful API Integration, Web Deployment, Database Management, UI/UX Wireframing

WORK & TEACHING EXPERIENCE

PT Telkom Akses | Procurement & Partnership Management Intern Jul 2025 – Sep 2025

- Designed and developed an internal web-based e-procurement prototype using PHP, Laravel, and MySQL to digitalize the goods recording workflow.
- Collaborated with the internal team to translate departmental requirements into system workflows, functionalities, and digital approval matrices.

Web Development Teaching Assistant Mar 2025 – Jun 2025

- Mentored 40+ students in understanding the Model-View-Controller (MVC) concept and implementing the Laravel framework for web application development.

PROJECT

Food & Beverage Ordering System – Taman Teras Café | https://tamancafe.co-id.id/

- Developed a full-stack web application (PHP/Laravel & MySQL) to digitalize the menu and support self-service ordering for customers.
- Built shopping cart features, order total calculation, and transaction history recording.
- Executed deployment and hosting configurations independently until the application was publicly accessible.

Web Based Decision Support System – Pilihanku (Final Year Project)

- Developed a full-stack web-based Decision Support System using PHP and Laravel to assist prospective students in selecting suitable academic majors.
- Implemented the Analytical Hierarchy Process (AHP) algorithm to automate matrix calculations and generate objective, data-driven recommendations.
- Created test cases and executed system validation using the Equivalence Partitioning technique to verify data inputs and ensure flawless calculation accuracy.

Bill Splitting Web Application – SABI

- Built a bill-splitting web application using Vue.js and Pinia.
- Designed user flows and implemented the interface design into a responsive single-page application.

ORGANIZATION EXPERIENCE

Information System Student Association Nov 2024 – Jan 2026
President

- Led and coordinated 45 committee members in executing organizational operations.
- Honed leadership, problem-solving, and cross-divisional communication skills, which highly support collaboration within software development teams.

EDUCATION

Telkom University Sep 2022 – Jan 2026
Bachelor of Information System Jakarta Campus – GPA 3.64 / 4.00
Vocational School Telkom Makassar Jul 2019 – Jun 2022
Computer and Network Engineering

CERTIFICATION

Certified System Analyst — Badan Nasional Sertifikasi Profesi (BNSP).
